

Incremental AI Filmmaking: Atomic Prompt Sandbox to 30s Commercial

Part I tests isolated prompt characteristics (Angles, Warmth, Style, Physics); Part II builds a commercial with Gemini Omni.

Part I · Sandbox

- Isolated Prompt Lab
- Extreme Camera Angles
- 7500K vs 2400K Warmth
- 5-Object Physics Lock
- Omni Multi-Turn Edit

[Atomic Sandbox ↗](#)

Stages 0-1 · Cast

- 2-Sentence Story Seed
- 3-Act Micro-Arc
- 35-Word Identity Block
- Neutral 5600K Portrait
- 4-Angle Turnaround

[Stage 0-1 Lab ↗](#)

Stages 2-3 · Board

- Empty Location Plates
- Hero Product ('SOLIS')
- 6-Shot Storyboard
- First/Last Frame Pairs
- Continuity Bridges

[Stage 2-3 Lab ↗](#)

Stage 4 · Omni Video

- gemini-omni-1.1-flash
- Up to 5 Image + 3 Vid Refs
- First/Last Keyframing
- 360p Draft -> 4K Upscale
- Conversational Tuning

[Stage 4 Lab ↗](#)

Stages 5-6 · Finale

- 180° Eyeline Dialogue
- gemini-3.8-flash-tts
- Lyria 3.5 (Img+Text)
- 10s Extend (up to 40s)
- Kinetic Text & Edit

[Prompt Library ↗](#)

[Full Workshop Repo, Atomic Sandbox & Prompts: https://github.com/AllInVaders/google-flow-storytelling-workshop](https://github.com/AllInVaders/google-flow-storytelling-workshop)

Why Single-Prompt Video Fails vs. Our Two-Part Production Method

Test isolated creative levers in Part I, then stack locked layers incrementally in Part II with Gemini Omni 1.1 Flash.

The 'One Giant Prompt' Trap (Point A)

- Trying to test angles, lighting, style, and story in a single prompt.
- Protagonist's face, glasses, and jacket mutate in every clip.
- Regenerating a take from scratch destroys an 85% great performance.
- Two speaking characters look away from each other.

Atomic Sandbox + Layer-Cake Pipeline (Point B)

- Part I: Isolate & master 1 variable per prompt (Angles, Warmth, Style).
- Part II: Lock story -> Lock faces -> Lock empty sets -> Storyboard.
- Animate & edit conversationally in gemini-omni-1.1-flash (up to 5 refs).
- Score from Text + Image in Lyria 3.5 (44.1 kHz stereo).

Two-Part Workshop Progression (Google Flow + Gemini Omni 1.1 Flash + Lyria 3.5)

[Facilitator Playbook ↗](#)

Part I (Atomic Sandbox) -> Push 1 isolated lever at a time: Camera Angles | Kelvin Warmth | Styles | 5-Object Physics
Stage 0-1 (Story & Cast) -> 2-sentence seed (gemini-3.8-flash) + 35-word Identity Anchor + 4-Angle Sheet (gemini-3-pro-image)
Stage 2-3 (Stage & Board) -> Empty Location Plates ([SCENE_STUDIO], [SCENE_CAFE]) + [PROP_CUP] + 6 Storyboard Keyframes
Stage 4-5 (Omni Video & Aud) -> gemini-omni-1.1-flash (Multi-Ref & First/Last Frame) + 180° Dialogue + gemini-3.8-flash-tts + lyria-3.5
Stage 6 (Omni Edit & Cut) -> Multi-turn conversational video editing + 10s scene extension (up to 40s) + Kinetic Typography

Rule #1: Calibrate isolated variables in the Atomic Sandbox first; then layer character, set, and motion in production.

Testing Isolated Variables: Extreme Camera Angles & Kelvin Warmth

Hold the subject constant and push camera perspective or Kelvin color temperature to the extreme in Image & Omni Video.

Lab A: Extreme Camera Angles & Whip-Pan

- Worm's-Eye (14mm): Camera on wet cobblestones looking up 85°.
- God's-Eye (90° Overhead): Flat-lay knolling on walnut desk.
- Omni Single-Take: Low-angle tamp -> whip-pan right -> crane up.
- Omni Conversational Edit: Re-angle to 180° orbit in 1 turn!

Lab B: Warmth & Kelvin Color Temperature

- Cold 7500K Blue-Hour: Cyan streetlamp, slate shadows, isolation.
- Warm 2400K Sunrise: Honey-gold sunbeams, volumetric steam.
- Omni Dynamic Shift: Clouds part to turn 7500K room into 3000K gold.
- Omni Conversational Relight: Flip cold rain to 2200K candlelight!

Copy-Paste Prompts A.3 + A.4 – Whip-Pan & Conversational Angle Edit (`gemini-omni-1.1-flash`)

[Open Atomic Sandbox ↗](#)

[TURN 1 - INITIAL GENERATION]: One continuous cinematic shot, no jump cuts. Start on an extreme low-angle macro view at counter height of a barista's hand tamping espresso with a heavy brass tamper. The camera whip-pans smoothly right across the oak counter, following a steaming terracotta cup as it slides toward an architect in tortoiseshell glasses, and cranes up into a high-angle overhead view.

[TURN 2 - CONVERSATIONAL EDIT]: Keep the exact character, cup movement, and audio, but change the camera to a slow 180° eye-level orbit.

Notice Turn 2: With Gemini Omni 1.1 Flash, you can change the camera angle or relight a video conversationally without starting over!

Testing Radical Film Styles, 5-Object Spatial Lock & Chain Physics

Push tactile material styles and multi-object spatial/physical interactions in Nano Banana Pro & Gemini Omni 1.1 Flash.

Lab C.1 · 35mm Kodak Vision3 500T Anamorphic

- Panavision C-Series anamorphic lenses + organic 35mm grain.
- Warm red-orange halation around glowing tungsten streetlamps, vertical oval bokeh, and horizontal blue streak flare.

[Style Prompts C.1–C.4 ↗](#)

Lab C.2 · 12fps Stop-Motion Clay & Felt Diorama

- Sculpted matte polymer clay figures with subtle thumbprints.
- Needle-felted merino wool espresso steam + blown-glass raindrops on a balsa wood counter at 12fps shutter cadence.

[Stop-Motion Prompt ↗](#)

Lab D.1 · 5-Object Spatial Lock (`gemini-3-pro-image`)

- Center: Terracotta cup embossed with gold 'SOLIS'.
- Left: Tortoiseshell glasses. Right: Brass watch at 6:00.
- Foreground: 3 coffee beans on blueprint. Back: Fluted glass carafe.

[5-Object Prompt D.1 ↗](#)

Lab D.2 · Chain-Reaction Physics (`gemini-omni-1.1-flash`)

- Brass marble rolls down oak ruler -> taps 3 brown-sugar dominoes -> nudges brass spoon into terracotta espresso cup -> ripples golden crema with synchronized foley.

[Physics Prompt D.2 ↗](#)

Multi-Object Secret: Number each object (1)–(5) with explicit spatial prepositions (Center, Left, Right, Foreground, Background).

Gemini Omni Kinetic Typography & Lyria 3.5 Multimodal Music Lab

Render in-video 3D typography that reacts to steam in Gemini Omni, and score images in 44.1 kHz stereo with Lyria 3.5.

Lab E: In-Video Kinetic Typography (`gemini-omni-1.1-flash`)

- Gemini Omni synchronizes legible on-screen text with physical motion.
- Prompt 3D gold serif letters ('AWAKEN THE CRAFT') to materialize above the cup as rising coffee steam physically swirls and parts through the letters!

Lab F: Latest Lyria 3.5 & 3 Pro (`lyria-3.5` / `lyria-3-pro-preview`)

- 44.1 kHz high-fidelity stereo audio from Text OR Image + Text!
- Pass a cold-rain or warm-sunrise image directly to lyria-3.5.
- Use structural tags ([Intro], [Verse], [Chorus], [Crescendo]) or lyria-3-clip-preview for exact 30s commercial beds.

Copy-Paste Lab E.1 (Omni Kinetic Text) & Lab F.1 (`lyria-3.5` 44.1kHz Commercial Score)

[Copy Labs E & F ↗](#)

[OMNI KINETIC TEXT]: Macro close-up of a steaming matte terracotta cappuccino cup on dark oak in golden light. As velvety steam rises, minimalist 3D gold serif letters reading "AWAKEN THE CRAFT" materialize above the rim; rising steam physically swirls through the letters.

[LYRIA 3.5 SCORE]: 30-second commercial soundtrack in 44.1kHz stereo, 92 BPM: [0:00-0:08 Intro] Sparse felt piano & rain; [0:08-0:20 Groove] Warm fingerpicked acoustic guitar & upright bass; [0:20-0:30 Crescendo] Uplifting chamber strings in major key.

Lyria 3.5 Multimodal Secret: Pass your storyboard keyframe image + text prompt into lyria-3.5 so the music matches the exact lighting mood!

Why We Focus on Gemini Omni (`gemini-omni-1.1-flash`) for Video Production

Combining multimodal reference fusion, conversational video editing, keyframe interpolation, and 360p-to-4K scaling.

1. Multimodal References (Up to 5 Img + 3 Vid)

- Simultaneously pass Text + up to 5 Image References + up to 3 Video References (3s).
- Lock Character A + Character B + Set + Hero Prop in one shot with native synchronized audio.

[Open Gemini Omni ↗](#)

2. Conversational Editing & First/Last Keyframes

- Multi-turn chat editing via Interactions API: swap lighting, angles, or props while keeping the take.
- First & Last Frame anchoring interpolates smooth camera transitions.

[Open Google Flow ↗](#)

3. 360p -> 4K Upscaling & 40s Scene Extension

- Rapidly prototype choreography in 360p (\$0.034/s) or 720p, then upscale winning takes to 1080p/4K.
- Extend clips in 3–10s increments up to 40 seconds total.

[Cross-Platform Matrix ↗](#)

2026 Model Stack: [gemini-3.8-flash \(Story\)](#) · [gemini-3-pro-image \(Ingredients\)](#) · [gemini-omni-1.1-flash \(Video\)](#) · [gemini-3.8-flash-tts](#) · [lyria-3.5](#)

Start with a 2-Sentence Story Seed & Expand to a 3-Act Micro-Arc

Constrain the commercial to 30 seconds, 2 characters, 2 contrasting Kelvin lighting worlds, and 1 hero prop.

The 2-Sentence Seed ('Solis — The 6:00 AM Spark')

"At 5:45 AM in a rainy city, an exhausted architect staring at a blank blueprint steps into a glowing corner café. One shared laugh and a warm terracotta cup of espresso reignite her creative spark."

3-Act Visual & Kelvin Lighting Arc (30 Seconds)

- Act I (0–8s): 7500K Cold Cyan Rain — Maya stuck at her studio desk.
- Act II (8–22s): 2700K Warm Amber Glow — Leo slides the Solis cup across the counter; a 2-line conversation.
- Act III (22–30s): 3000K Golden Sunrise — Maya sketches the bridge arch.

Copy-Paste Prompt 0.1 — Expand Story Seed (Run in Flow Agent / gemini-3.8-flash)

[Copy Prompt 0.1 ↗](#)

Act as a Commercial Film Director. I have a two-sentence story seed for a 30-second brand commercial for 'Solis Artisan Coffee':
"At 5:45 AM in a rainy city, an exhausted architect staring at a blank blueprint steps into a glowing corner café.
One shared laugh and a warm terracotta cup of espresso reignite her creative spark."
Expand this seed into a tight 3-Act Micro-Story (Act I: The Creative Block, Act II: The Warm Encounter, Act III: The Spark Reignited).
Keep it grounded in 2 characters (Maya, architect; Leo, barista), 2 locations, and 1 hero prop (matte terracotta Solis cup).

Color & Mood Arc: 7500K Cold Pre-Dawn Rain (Problem) -> 2700K Warm Edison Café (Connection) -> Golden Sunrise (Transformation).

The 3-Pillar System for Zero Face Drift in Gemini Omni & Google Flow

Combine a verbatim 35-word Identity Anchor Block, a neutral 5600K studio portrait, and a 4-Angle Turnaround Sheet.

Pillar 1 · The 35-Word Identity Anchor Block

- Never write 'a young woman' in Shot 1 and 'Maya' in Shot 2.
- Lock 5 traits: Age/Heritage + Skin micro-feature (freckles/crinkles) + Hair clip + Eyewear + Outer/Inner Wardrobe.
- Paste verbatim into every shot.

[Anchor Templates ↗](#)

Pillar 2 · Neutral 5600K Character Ingredient

- Generate your master portrait on a clean neutral grey backdrop with soft 5600K studio light (85mm, f/2.0).
- Avoid colored neon light in reference portraits so lighting adapts cleanly to any scene.

[Stage 1 Guide ↗](#)

Pillar 3 · The 4-Angle Turnaround Sheet

- Prompt Nano Banana Pro (gemini-3-pro-image) for a 4-panel sheet in one 16:9 frame: Front, 45°, Profile, Smiling Close-Up.
- Pass angle-matched panels into gemini-omni-1.1-flash (supports up to 5 image refs!).

[Turnaround Prompt ↗](#)

Pro Tip: Distinct accessories (round tortoiseshell glasses + ochre knit cardigan) act as high-weight visual anchors in Gemini Omni.

Live Lab #1: Generating Locked Character Portraits & Turnaround Sheets

Run these prompts in `gemini-3-pro-image` (Nano Banana Pro) or Google Flow's Ingredients Panel and pin both characters.

Protagonist Anchor: `[CHAR\_MAYA]` (Architect)

"Maya, a 29-year-old Latina architect with warm olive skin, subtle freckles across the nose, expressive dark brown eyes, shoulder-length wavy raven hair tied in a loose low clip, wearing an oversized ochre knit cardigan over a white crew-neck tee and round tortoiseshell glasses."

Co-Star Anchor: `[CHAR\_LEO]` (Barista)

"Leo, a 45-year-old artisanal barista with a neatly trimmed salt-and-pepper beard, warm crinkles around hazel eyes, wearing a charcoal linen apron over a rolled-sleeve chambray shirt. Neutral studio backdrop, soft warm key light, 85mm prime lens."

Copy-Paste Prompt 1.2 – 4-Angle Face Consistency Sheet (`gemini-3-pro-image`)

[Open Web Prompt Deck ↗](#)

A 4-panel character reference sheet on a clean neutral grey background showing the exact same woman in four views:

(1) Front view neutral expression, (2) 45-degree three-quarter view with a tired sigh,
(3) Side profile looking down thoughtfully, (4) Front close-up with a warm, genuine smile.

Subject: Maya, a 29-year-old Latina architect with warm olive skin, subtle freckles across the nose, expressive dark brown eyes, shoulder-length wavy raven hair tied in a loose low clip, wearing an oversized ochre knit cardigan and round tortoiseshell glasses.

In Google Flow / AI Studio: Generate Maya & Leo in Nano Banana Pro -> Save as reference assets for Gemini Omni 1.1 Flash.

Build the Stage Before Calling the Actors: Empty Plates & Product Lock

Generate actor-free Location Ingredients and a macro Product Ingredient so room layouts and brand logos stay rock-solid.

Scene Ingredient A `[SCENE\_STUDIO]` (7500K)

- Minimalist architect's loft desk at 5:45 AM before dawn.
- Tall rain-streaked industrial window + cool 7500K cyan drafting lamp.
- Explicitly prompt: 'Empty chair, no people' so the plate is clean.

[Prompt 2.1 ↗](#)

Scene Ingredient B `[SCENE\_CAFE]` (2700K)

- Cozy wood-paneled artisan espresso bar at dawn.
- Warm 2700K amber Edison bulbs, brass espresso machine, oak counter.
- Fogged rainy window in background for visual contrast.

[Prompt 2.2 ↗](#)

Object Ingredient `[PROP\_CUP]` (Hero Product)

- Handcrafted matte terracotta ceramic cup + saucer.
- Minimalist gold embossed sun emblem and clean word 'SOLIS'.
- Generated in Nano Banana Pro (gemini-3-pro-image) for exact typography.

[Prompt 2.3 ↗](#)

Why 'Empty Chair, No People'? If a location plate already contains a random person, the video model will fight your Character Ingredient.

Live Lab #2: Generating `[SCENE\_STUDIO]`, `[SCENE\_CAFE]` & `[PROP\_CUP]`

Create and pin these 3 visual assets so your project holds all 5 core building blocks of the commercial.

Prompt 2.1 — Cold Rainy Studio (`[SCENE\_STUDIO]`)

"Wide establishing interior shot of a minimalist architect's loft desk by a tall rain-streaked industrial window at 5:45 AM before dawn. Empty chair, no people. A drafting lamp casts a cool 7500K cyan-blue pool of light over an unrolled blank blueprint and scale ruler. 35mm anamorphic lens."

Prompt 2.2 — Warm Corner Café (`[SCENE\_CAFE]`)

"Medium-wide interior shot of a cozy, wood-paneled artisan espresso bar at dawn. Empty frame with no people. Warm 2700K amber Edison bulbs and a polished brass espresso machine gleam with gentle steam rising. Rain outside fogged window, reclaimed oak counter in foreground."

Copy-Paste Prompt 2.3 — Hero Product Ingredient (`[PROP\_CUP]` in Nano Banana Pro)

[Copy Stage 2 Prompts ↗](#)

Macro studio product photograph of a handcrafted matte terracotta ceramic cappuccino cup resting on a matching terracotta saucer. A minimalist gold embossed sun emblem and the word "SOLIS" are printed cleanly on the front of the cup. Rich velvety hazelnut crema with delicate rosetta latte art on top, a wisp of steam rising. Soft warm rim lighting, neutral dark studio background, 100mm macro lens.

Checkpoint: You now have 5 locked Ingredients — [CHAR_MAYA], [CHAR_LEO], [SCENE_STUDIO], [SCENE_CAFE], and [PROP_CUP].

The 6-Shot Commercial Storyboard & Reference Combination Matrix

Lock framing, Kelvin lighting transitions, and First/Last keyframe pairs in still images before generating video.

Shots 1 & 2 · Act I -> Act II Threshold (0–10s)

- Shot 1: [CHAR_MAYA] + [SCENE_STUDIO] — Medium close-up at 5:45 AM; cold 7500K cyan rain reflects on her glasses.
- Shot 2: [CHAR_MAYA] + [SCENE_CAFE] — Tracking shot stepping out of blue rain into warm 2700K amber café glow.

[Keyframes 3.1 & 3.2 ↗](#)

Shot 3 · Hero Product First -> Last Pair (10–15s)

- First Frame: Espresso pouring in dual streams into the matte terracotta SOLIS cup.
- Last Frame: Leo's hand sliding the steaming SOLIS cup across the oak counter toward the camera.

[Keyframe Pair 3.3 ↗](#)

Shots 4 & 5 · Two-Character Conversation (15–25s)

- Shot 4 (OTS): [CHAR_LEO] on right looking screen-left over Maya's shoulder (+ [SCENE_CAFE] + [PROP_CUP]).
- Shot 5 (Reverse): [CHAR_MAYA] on left looking screen-right, holding the SOLIS cup and smiling.

[Keyframes 3.4 & 3.5 ↗](#)

Shot 6 · Act III Spark Reignited Finale (25–30s)

- First Frame: Golden sunrise hits the studio desk as Maya sets the SOLIS cup beside the blank blueprint.
- Last Frame: High-angle over shoulder as her pencil sweeps a bold bridge arch + Kinetic 'SOLIS' title.

[Keyframe Pair 3.6 ↗](#)

Gemini Omni Advantage: Pass up to 5 reference images per shot (e.g., Leo + Maya + Café + SOLIS Cup in Shot 4)!

Live Lab #3: Generating Storyboard Stills Before Animating Video

Combine Character + Scene references into still frames to verify composition and prepare First/Last frames for Gemini Omni.

Keyframe 3.1 — Shot 1 Start Still (Maya + Studio)

Attach [CHAR_MAYA] + [SCENE_STUDIO]: Maya sits at the rain-streaked architect's desk at 5:45 AM resting her chin on her hand, staring at the blank blueprint. Cool 7500K cyan window light reflects on her tortoiseshell glasses.

Keyframe 3.3 — Shot 3 First & Last Frame Pair

- First Frame: Macro shot under brass portafilter pouring espresso into the terracotta SOLIS cup.
- Last Frame: Leo's hand sliding the steaming SOLIS cup across the reclaimed oak counter into foreground close-up.

Copy-Paste Prompt 3.1 — Composited Storyboard Keyframe (Multi-Image Reference)

[All 6 Keyframe Prompts ↗](#)

Using the character reference for Maya and the studio location reference:
Medium close-up cinema still of Maya, a 29-year-old Latina architect with warm olive skin, subtle freckles, wavy raven hair in a low clip, round tortoiseshell glasses, and an ochre knit cardigan, sitting at the rain-streaked architect's desk at 5:45 AM. She rests her chin on her hand, staring at the blank blueprint with a tired expression. Cool cyan-blue pre-dawn window light reflects on her glasses. 35mm anamorphic lens.

Why generate First & Last frames for Shot 3? Because Gemini Omni's keyframe anchoring guarantees the SOLIS logo lands sharply!

Animating with `gemini-omni-1.1-flash`: Multi-Ref, Keyframes & 4K

Combine up to 5 image references, First/Last Frame keyframing, 360p fast prototyping, and conversational edits.

Mode A · Multi-Reference Video (Up to 5 Img Refs)

- Pass [CHAR_MAYA] + [SCENE_STUDIO] + [PROP_CUP] into gemini-omni-1.1-flash (or Flow Ingredients to Video).
- Best for natural acting & continuous camera moves (Shots 1, 2, 4, 5).

[Open Gemini Omni ↗](#)

Mode B · First & Last Frame Keyframing

- Anchor both First Frame + Last Frame in gemini-omni-1.1-flash (or Flow Frames to Video).
- Perfect for camera orbits, macro product reveals, and match cuts (Shots 3 & 6).

[Stage 4 Guide ↗](#)

Draft at 360p -> Edit Conversationally -> 4K

- Step 1: Generate fast 360p/720p draft (3s–10s).
- Step 2: Refine lighting or angle via multi-turn chat.
- Step 3: Upscale winning take to crisp 1080p or 4K at 24fps!

[Prompt Formula ↗](#)

Gemini Omni Workflow: Draft at 360p (\$0.034/s) -> Conversational Edit -> Upscale final hero shot to 4K!

Live Lab #4: Running Multi-Reference & First/Last Frame Video

Generate the opening creative block (Shot 1), the café entrance (Shot 2), and the macro espresso slide (Shot 3).

Shot 1 — Multi-Ref Video (`gemini-omni-1.1-flash`)

- Attach Refs: [CHAR_MAYA] + [SCENE_STUDIO]
- Camera: Slow, smooth dolly-in toward medium close-up.
- Action: Maya exhales a quiet sigh, taps her wooden pencil twice on the blank blueprint, glances at the rain.

Shot 3 — First & Last Frame Keyframing

- First Frame: Espresso pouring into SOLIS cup.
- Last Frame: Leo's hand sliding SOLIS cup to foreground.
- Camera: 100mm macro tracking shot, 60fps slow-motion feel with rising golden steam.

Copy-Paste Prompt 4.1 — Shot 1 Video (`gemini-omni-1.1-flash` with Native Synchronized Audio)

Slow, smooth dolly-in toward a medium close-up of Maya, a 29-year-old Latina architect with warm olive skin, subtle freckles, wavy raven hair in a low clip, round tortoiseshell glasses, and an ochre knit cardigan, sitting at her drafting table by a rain-streaked window at 5:45 AM. She exhales a quiet sigh, taps her wooden pencil twice against the blank blueprint, and glances out at the rain. Cold 7500K cyan streetlamp reflections glide across her glasses. 35mm anamorphic lens.

Audio: Soft rhythmic rain pattering against window glass, distant thunder, two crisp wooden pencil taps, and a quiet sigh.

[Copy Shots 1-3 Prompts ↗](#)

Gemini Omni natively generates synchronized rain, wooden pencil taps, and espresso extraction foley with every video clip!

Directing Two-Character Conversations & Multimodal Scoring in Lyria 3.5

Combine the 180° Eycline Rule, Gemini Omni lip-sync, Gemini 3.8 Flash TTS, and Lyria 3.5 (44.1 kHz Text + Image scoring).

1. The 180° Eycline Rule (Shot-Reverse-Shot)

- To make two clips look like a real conversation, lock opposite screen directions:
- Shot 4 (Leo): Positioned on RIGHT of frame, looking SCREEN-LEFT.
- Shot 5 (Maya): Positioned on LEFT of frame, looking SCREEN-RIGHT.

[180° Rule Guide ↗](#)

2. Gemini Omni Native Lip-Sync Dialogue

- Put spoken words in single quotes ('...') right after vocal tone:
- "Leo speaks in a warm baritone: 'Rough night with the blueprints?'"
- Keep dialogue to 8–12 words per 6–8s clip (~2 words/sec).

[Dialogue Prompts ↗](#)

3. Studio Voiceover (`gemini-3.8-flash-tts`)

- Use gemini-3.8-flash-tts with expressive voices (Kore, Charon, Aoede, Puck, Fenrir) for the brand tagline.
- Supports affective tags: [sigh], [short pause].

[TTS Prompt 5.3 ↗](#)

4. Latest Lyria 3.5 Score (`lyria-3.5` / `lyria-3-pro`)

- Pass Keyframe 3.3 Image + Text into lyria-3.5 (or lyria-3-clip-preview) for 44.1 kHz stereo music: sparse felt piano (0–8s) -> warm acoustic guitar (8–20s) -> strings crescendo (20–30s).

[Lyria 3.5 Prompt ↗](#)

Audio Stack: [gemini-omni-1.1-flash \(Lip-Sync + Foley\)](#) + [gemini-3.8-flash-tts \(Voiceover\)](#) + [lyria-3.5 \(44.1kHz Multimodal Score\)](#).

Live Lab #5: Directing Leo & Maya's Conversation + Lyria 3.5 Score

Run Shot 4 (OTS on Leo) and Shot 5 (Reverse on Maya) in `gemini-omni-1.1-flash`, then score with `lyria-3.5`.

Shot 4: Leo Speaks (Looking Screen-Left)

Over-the-shoulder medium shot from behind Maya's ochre shoulder on the left, focusing on Leo on the right looking screen-left with a warm smile. Leo speaks in a warm baritone: 'Rough night with the blueprints? Start with this—the lines always follow.'

Shot 5: Maya Replies (Looking Screen-Right)

Reverse-angle medium close-up of Maya on the left looking screen-right. She wraps both hands around the terracotta SOLIS cup, inhales the steam, smiles, and replies softly: 'You just saved the whole skyline, Leo.'

Copy-Paste Prompts 5.2, 5.3 & 5.4 – Omni Reverse Shot + `gemini-3.8-flash-tts` + `lyria-3.5`

[Copy Stage 5 Prompts ↗](#)

[SHOT 5 - gemini-omni-1.1-flash]: Reverse-angle medium close-up of Maya on the left looking screen-right, holding the terracotta SOLIS cup.

She smiles and replies softly: 'You just saved the whole skyline, Leo.' Warm golden key light, 50mm lens.

[TTS - gemini-3.8-flash-tts (Kore)]: "[sigh] Every bold idea starts before the sun rises. [short pause] Solis. Awaken the craft."

[SCORE - lyria-3.5 (44.1kHz)]: [0:00-0:08] Sparse felt piano & rain -> [0:08-0:20] Warm acoustic guitar -> [0:20-0:30] Strings crescendo.

Verify Across Shots 4 & 5: Leo looks left -> Maya looks right -> The terracotta SOLIS cup sits on the oak counter between them.

Finishing with Gemini Omni Conversational Edit, 40s Extend & Repo

Refine takes conversationally, extend clips up to 40s, sync kinetic brand text, and explore all 3 commercial packs on GitHub.

1. Omni Conversational Edit & 40s Extension

- Multi-turn edit on Shot 5: intensify 2700K golden rim light & steam without losing Maya's acting.
- Extend in 3–10s increments (up to 40s) as Maya takes her first sip!

[Prompt 6.1 ↗](#)

2. Shot 6 Finale with Kinetic Typography

- Maya's charcoal pencil sweeps a bold bridge arch in golden sunrise.
- Clean gold serif text 'SOLIS — AWAKEN THE CRAFT' materializes in the rising coffee steam (4K upscale).

[Prompt 6.2 ↗](#)

3. GitHub Repo & 3 Full Commercial Packs

- Part I Atomic Prompt Sandbox
- Pack 1: Solis Artisan Coffee
- Pack 2: NovaPay Fintech
- Pack 3: Kuntur Outdoor Gear
- Interactive Web Portal

[Open GitHub Repo ↗](#)

Star & Fork the Updated Workshop Repo: <https://github.com/AllInVaders/google-flow-storytelling-workshop>
